This is a minimal Beamer template using the `moloch` theme.

The `useful.sty` package provides the `\footcite{...}` command for citations in footnotes.

Example citation: [1].

[1] Kautz. “The third AI summer: AAAI Robert S. Engelmore Memorial Lecture”. *AI Magazine*, 2022.

You can also use `\fullcite*{...}` to only print the citation in the footnote, without the reference number in the text. Henry A. Kautz. “The third AI summer: AAAI Robert S. Engelmore Memorial Lecture”. In: *AI Magazine* 43.1 (2022), pp. 105–125. DOI: [10.1002/aaai.12036](https://doi.org/10.1002/aaai.12036)

This allows you to handle the citation `\footcite{...}` and the reference separately, which can be useful with overlays [1].
